About me

Junior Frontend Developer with experience working on projects across (Transport, Automotive, Construction, Hospitality) industries. I was using the React JS library on two of the projects I was developing. I gained a lot of knowledge regarding Frontend development at the time I was taking the courses from Scrimba, Great Learning and Youtube tutorials, where I learned: Html, CSS, JS, React, Bootstrap, and Figma.

During my journey of becoming a Frontend Developer, I was fortunate enough to be guided by a senior Full Stack Developer and also took some private lessons. I am familiar with Git commands and GitHub repositories.

My skills:

- HTML
- CSS
- Bootstrap
- JavaScript
- React Js
- Git
- Github
- Figma

Willing to start immediately as an Junior Frontend / intern and be remote

For projects contact:

Email: simamarius1331@gmail.com

Projects

Rent a car App

period Jun 2023 - Jun 2023

I created this web application for the company DD LEASING CORPORATION SRL, in which I was the founder, to generate the rent contracts and the minutes of receipt and takeover, the contracts are generated in PDF with the Print button, also for version 2 which is not public but only for this company, I also added a database with Firebase, with client addition in the database and with data retrieval and auto-completion in the inputs if the client exists in the database by his name.

Build Masters React

period May 2023 - May 2023

This website was created in React, which contains 5 components for the landing page component, in the services component there is a component that contains all the data that will be used as props to render a templated component for each individual service. The website is responsive for desktop, laptop, tablet and phone.

Units Convertor

period Feb 2023 - Feb 2023

I created this website to practice algorithmic functions. The website is responsive for desktop, laptop, tablet and phone.

Football Scoreboard

period Nov 2022 - Nov 2022

I did this project for beginners at the Scrimba course, to learn JS functions, how to

target an element by its id and then change its value after calling the corresponding increment function for each button: + 1,+2,+3 and a function for the button: New Game to reset the values to 0.

Calculator

period Nov 2022 - Nov 2022

I did this beginner project to practice more JS functions, how to target an element by its id, how to change the value from result input. I add the button LR to show the last result. In calculate function if the result is not an integer to round the result to a maximum of 5 decimal places

DD Leasing

period Jul 2022 - Jul 2022

This website was created with bootstrap template for the company DD Leasing Corporation SRL from Arad, Romania.

Portfolio

period Feb 2022 - Feb 2022

Portfolio created with my projects, I update it when I add another project to this portfolio
